

# COMMERCIAL INSURANCE MADE FAST AND EASY.

## Who are we?

Our goal is to make commercial insurance easier and better for everyone. How? A lot of companies today aim to replace human interaction with Artificial Intelligence and bots ... but, we firmly believe it's our collaboration with agents like you, alongside our AI, that makes our product and service unbeatable.

1515 Orange Ave, Orlando, FL

## A bindable quote in 60 seconds or less - anchored in data science.

By combining a better user experience and big data, we enable you to price, quote and bind commercial coverage in about the same time it takes to check tomorrow's weather, with just an address. That means you can spend more of your time writing business and less doing paperwork.

## What we cover.

Swyfft offers Excess and Surplus Lines coverage for a range of mostly single-location, single or multi-building risks, including:

- Apartment Buildings and Complexes (with or without retail)
- Condominium Associations
- Shopping Center Owners (LRO)
- Office Building Owners (LRO)

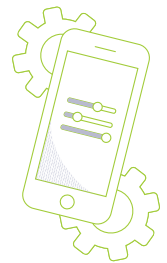

Coverage through Swyfft\* is rated A- by A.M. Best Company, so your clients know we've got them.

## TRUSTED BY AGENTS

### How are we different?

We're the first in the industry to use LIDAR (light detection and ranging) data in our patented models. This allows us to gather and examine information about natural and manmade environments with greater accuracy and precision, and enables risk assessment at an address level. This means more accurate predictions for losses from hurricanes, fires and other perils.

### Why that's better for you.

With our powerful insights, we can pass on any benefits to your commercial clients. Those benefits are likely to include lower rates from Swyfft versus other insurers. Clients like that. And you can write more business in less time. Who doesn't like that?
